Journal of Fluid Mechanics **Volume 310 10 March 1996**

M. D. Zhou, C. Heine & I. Wygnanski The effects of excitation on the coherent and random motion in a plane wall jet *page* 1

P. Indelman Averaging of unsteady flows in heterogeneous media of stationary conductivity 39

J. J. Sturman, G. N. Ivey & J. R. Taylor Convection in a long box driven by heating and cooling on the horizontal boundaries 61

G. Pedrizzetti Unsteady tube flow over an expansion 89

A. Kluwick & St. Scheichl Unsteady transonic nozzle flow of dense gases 113

R. M. Kerr Rayleigh number scaling in numerical convection 139

J. S. Allen, P. A. Newberger & R. A. Holman Nonlinear shear instabilities of alongshore currents on plane beaches 181

D. A. Briggs, J. H. Ferziger, J. R. Koseff & S. G. Monismith Entrainment in a shear-free turbulent mixing layer 215

P. W. Hammerton & E. J. Kerschen Boundary-layer receptivity for a parabolic leading edge 243

H. M. Blackburn, N. N. Mansour & B. J. Cantwell Topology of fine-scale motions in turbulent channel flow 269

O. Yu. Zikanov Symmetry-breaking bifurcations in spherical Couette flow 293

R. H. Davis Hydrodynamic diffusion of suspended particles: a symposium 325

Y. Liu & D. K. P. Yue On the time dependence of the wave resistance of a body accelerating from rest 337

D. H. Peregrine & S. Kalliadasis Filling flows, cliff erosion and cleaning flows 365

REVIEWS

Exponential Attractors for Dissipative Evolution Equations, by A. Eden, C. Foias, B. Nicolaenko and R. Temam; Nonstandard Methods for Stochastic Fluid Mechanics, by M. Capiński and N. J. Cutland 375

Fluid Mechanics for Petroleum Engineers, by E. Bobok; Mathematic Theory of Oil and Gas Recovery, by P. Bedrikovetsky 376

A One-dimensional Introduction to Continuum Mechanics, by A. J. Roberts 378

INDEX TO VOLUME 310 379

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 380
